

Features

Write-n-Record®

Applications

Your solution for coordinating handwritten notes with recordings of sound and pictures

- ➔ Handwritten notes on paper, identified by bar codes
- ➔ Sound Recording up to 1 hour per session
- ➔ Pictures taken with any digital camera
- ➔ Bar code scanning available on both PC and PPC
- ➔ Print your own bar codes from the PC
- ➔ Wireless transfer of session data from PPC to PC. Alternative transfer via memory card
- ➔ Retrieval on PC by bar code scanning of note paper or by search on session content
- ➔ Session playback shows all session elements and sounds at times they were captured
- ➔ Sessions are stored in "archive" directories on PC. You can have multiple archives

Wirelessly transfer captured data (as a "session") to a host PC for permanent storage and retrieval

Use your Pocket PC (PPC) to collect sound and pictures on location and automatically transfer them to a PC as a "session" for permanent storage and retrieval.

March 10, 2004
Handwritten notes will never go out of style. Everyone uses them - making notes is second nature to most of us, 😊

Bar codes provide coordination of these notes with the recordings.
